

Locating a magazine/journal at home.

Find a resource using the Infotrac databases.

- Using Infotrac databases, students can find full text articles from magazines, journals and reference books.
- Databases are searchable by keyword.
- Students can refine or limit searches.
- Databases can be used at home with passwords which are available at the circulation desk in the library.

Type in the Infotrac web address.

<http://infotrac.galegroup.com/itweb/kctcsprcc>

Click Health and Wellness Resource Center.

The screenshot shows the Thomson Gale Databases interface. At the top left is the Thomson Gale logo. At the top right, it says "Big Sandy Community & Technical College KCTCS". Below the logo is a "Quick Search" box with a "Find:" field and a "SEARCH" button. To the right of the search box is a list of "Cross Searchable Databases". The list includes "Health Reference Center Academic" and "Expanded Academic ASAP". At the bottom of the list is the "Health and Wellness Resource Center", which is highlighted by a black arrow pointing from the left. The "Health and Wellness Resource Center" entry includes the text: "Provides instant access to carefully compiled and trusted medical reference materials. Includes nearly 400 health/medical journals, numerous reference volumes, over 700 health videos from partner Healthology, Inc., hundreds of pamphlets and health-related articles from 2,200 general interest publications in addition to a broad collection of Thomson Gale reference titles. Material contained in this Resource Center is intended for informational purposes only."

Health and Wellness Resource Center 1980 - Aug 2006
Provides instant access to carefully compiled and trusted medical reference materials. Includes nearly 400 health/medical journals, numerous reference volumes, over 700 health videos from partner Healthology, Inc., hundreds of pamphlets and health-related articles from 2,200 general interest publications in addition to a broad collection of Thomson Gale reference titles. Material contained in this Resource Center is intended for informational purposes only.

Your Screen should look similar to this.

The screenshot displays the 'Health & Wellness RESOURCE CENTER' website. At the top left is the logo for 'Big Sandy Community & Technical College KCTCS'. Navigation links include 'Help', 'Search Tips', 'Gale Group Databases', and 'List of Sources'. The 'THOMSON GALE' logo is prominently displayed, with a note 'Powered by Infotrac'. A search bar is present with buttons for 'Search', 'Clear Form', and 'Advanced Search'. Below the search bar, there are options to 'Limit the current search' (to full text articles or refereed publications) and date filters (From and To) with dropdown menus for month, day, and year. A 'Quick Start' section offers links to 'Medical Encyclopedia', 'Drug Finder', 'Health Assessment Tools', 'Health Organization Directory', 'Medical Dictionary', and 'Links to Other Sites'. On the right, there is a 'Healthology' logo, a 'Search Our Health Library' section with a keyword input field, and a 'Multimedia Library' section with a dropdown menu for selecting a health topic (ADD & ADHD, Allergy, Alternative Medicine). A footer contains a navigation menu, a disclaimer: 'This information is not a tool for self-diagnosis or a substitute for professional care.', the Thomson Gale logo, a logo for the Health On the Net Foundation, and copyright information: 'Copyright © 2005 by Thomson Gale. All rights reserved. Thomson Gale is part of The Thomson Corporation.'

In the search box, type breast and cancer and treatment. Make sure to limit your search to full-text articles. Then click the search button.

Why use the word and?

When you perform a search using the Boolean connector “and”, you link two or more keywords. The records that are found must have both keywords. Other Boolean connectors are “or” and “not”.

Please click the title of an article.

[Breast cancer](#)

What is it?

¹ **Breast cancer** is found as a tumor (lump) and is seen as a spot on a mammogram. The lump may or may not be large enough to feel. Mammograms can see lumps in the **breast** which are too small to feel. Your breasts are made of many lobes (sections), ducts, and vessels (small tubes). The vessels carry liquids such as lymph (limf) and blood. The lymph vessels lead to small bean-shaped organs called lymph nodes. These lymph nodes are in your armpit and chest and near your collarbone. Ducts carry milk from the lobes to the nipple of the **breast**.

² Normal cells divide (split) in a planned way, making more cells only when needed. **Cancer** happens when cells grow and divide without control or order, often making too much tissue (tumor). **Breast cancer** cells may grow into nearby healthy tissue. Or, they may break away from the tumor. These cells travel through the blood stream or lymphatic (lim-fat-ik) system to other parts of the body. It is called metastasis (meh-tas-ta-sis) or "travels" when tumor cells spread to other areas of the body. **Breast cancer** can begin in the lobes or the **breast** ducts. It can spread into the lymph nodes even when the lump is very small.

³ The cure rate is increased if **breast cancer** is found and treated early.

Causes: There is no known cause of **breast cancer** but you cannot catch it from someone else. Most **breast** cancers happen in women who have no risk factors. But, there are things that may put you at higher risk for getting **breast cancer**.
